

## TOTAL HEALTH MANAGEMENT

# Predict the risk. Prevent the cost.

---

MedGuard connects predictive analytics, award-winning wellbeing, and clinical care into one system — so the right program reaches the right person at the right time

## NO ONE ELSE PACKAGES ALL THREE

---

### Predictive Analytics

Find cost & clinical risk before it's a claim.

---

### Comprehensive Wellbeing

The healthiest diet on earth, at scale.

---

### Clinical Care

Disease management & coaching, clinically validated.

# Three capabilities most vendors sell separately.

## MedGuard runs them as one.

Analytics, wellbeing, and clinical care usually live in separate contracts, platforms, and data silos. MedGuard runs them as one integrated system out of the box — insight leads to intervention, and every intervention is tracked for engagement, outcomes, and cost.

1

### **Analytics directs the programs**

Risk and care gaps route each member straight to the program they actually need.

2

### **Programs inform the clinicians**

DM nurses see member activity, then review, evaluate, and coach the right people.

3

### **Clinicians close the loop**

Providers assign programs and set targets — results feed back to the model, so it sharpens every year.

## WHY MEDGUARD

# #1

### **Predictive analytics**

Rated best in the field for population-level risk stratification.

# 5<sub>yrs</sub>

### **Award-winning platform**

Our programs have won awards for our clients five years in a row.

# 1:1

### **Clinical care for every person**

Exactly what each member needs for their wellbeing journey.

## 1 PREDICTIVE ANALYTICS

# Find your costs before they find you.

Most analytics show you what already happened — the view in the rear-view mirror. MedGuard shows you what's about to happen, before it does. And not just across your population: down to each individual member.

### PREDICT

Risk and cost for each member

### PLAN

A care plan specific to each person

### DELIVER

Right program, right person, right time

- ✓ Emerging conditions and spend, before the claim
- ✓ Clinical cost drivers and gaps in care
- ✓ A Motivation Index score for every member
- ✓ Annual impact assessment

# #1

**Best predictive analytics in the field**

Savings for the company and the health plan.

## 2 COMPREHENSIVE WELLBEING

# The healthiest diet on earth, delivered at scale.

Built on the Mediterranean lifestyle, the member platform gives every participant one intuitive place to see what to do, how to do it, and what they earn for doing it — branded with your logo and colors.

### Member portal

Requirements, incentives, leaderboards, benefits, and HR forms at a glance.

### Challenges

Activity, mindfulness, nutrition, and weight — with weekly coaching, wearables, and teams.

### Education

Lifestyle & disease-management programs, meditations, webinars, live cooking demos.

### AI engagement engine

Learns, person by person, which message works and when — and keeps testing.

# #1

### Best Diet Overall

The Mediterranean diet — ranked the #1 Best Diet Overall by U.S. News & World Report.

Every program, challenge, and article is trackable and tied to incentive management.

### 3 CLINICAL CARE & COACHING

## Clinical care for a **truly whole** population.

Disease-management nurses and coaches work from the same data as the platform — so every level of risk gets the right level of care.

#### CARE GAPS

##### Close them

Analytics reveal the gaps; nurses help members close them.

#### MEDIUM RISK

##### Prevent health erosion

Stop the steady slide into higher-risk, higher-cost categories.

#### HIGH RISK

##### Bring it back down

Professional nurses guide the highest-need members back to health.

#### AT EVERY LEVEL OF RISK

- ✓ Nurses and coaches work from each member's full record
- ✓ Care is matched to what the data shows, not a one-size protocol
- ✓ Emerging risk is handled before it becomes a high-cost event
- ✓ The highest-need members get hands-on guidance back to health

## Where they are.

### With exactly what they need

Our clinical care meets people where they are — which is why it is so effective.

# Start with the people ready to change.

Two members with the same risk need very different approaches. The clinically validated Motivation Index scores each member's readiness to act — so you don't just know who's likely to get sick and what it will cost, you know who will respond. Start there.

1

2

## Ready to make a change

Levels 1–2. Prioritized for coaching now — these members will make the healthy changes.

3

4

5

## Not ready yet

Levels 3–5. Matched with lighter-touch messaging that builds readiness over time.

01

## Identify

Behavioral, clinical, and biometric data rank each member's readiness to change.

02

## Prioritize

Coaching starts with the highest-readiness members — the ones who'll act now.

03

## Impact

Nurse time goes where it does the most good at the lowest cost — savings from day one.

EMERGING • GLP-1

Early indications are that the Motivation Index also predicts who stays on — or drops — their GLP-1, giving coaches a lever to keep members on therapy.

DAY-ONE  
IMPACT

More efficient  
nurse time

Higher conversion  
rates

Lower cost per  
outcome

# Where the loop closes.

The interface between clinical care and the wellbeing platform.

## 1 Analytics sends the signal

Each member's health risk and Motivation Index arrive in the Coaching Station.

## 2 The care team acts

Nurses and coaches see the whole record — and know who is ready to change.

## 3 Programs reinforce the coaching

Prescribe a walking challenge, nutrition program, mindfulness practice, or biometric target — with incentives attached.

## 4 Outcomes flow back

Coaching and program results feed analytics — so you can see how your population is doing.

## INSIDE THE COACHING STATION

- Biometrics + HRA in one view
- Assign programs & targets
- Track coaching progress

The right program, to the right person, at the right time.

## THE RESULT

# Everyone comes out ahead.

### Payers

Real, measurable savings — without pulling the benefits members value.

### Members

Better health now, built around them, with a finish line in sight.

### Employers

Lasting employee health — not a recurring bill that only grows.

## CONFIGURED AROUND YOU

### Your population, your benefit strategy, your brand.

- ✓ Modular platform, programs, and reporting
- ✓ A communication plan unique to your population
- ✓ Marketing campaigns that drive enrollment
- ✓ Your logo and colors throughout the member experience

GLP-1 cost control is one application. MedGuard works across any clinical condition — and the cost it carries.
