

TOTAL HEALTH MANAGEMENT

Predict the risk. Prevent the cost.

MedGuard connects predictive analytics, award-winning wellbeing, and clinical care into one system — so the right program reaches the right person at the right time

THE POWER OF THREE BEST-IN-CLASS PROGRAMS, FULLY INTEGRATED

Predictive Analytics

Find cost & clinical risk before it's a claim.

Comprehensive Wellbeing

The healthiest diet on earth, at scale.

Clinical Care

Disease management & coaching, clinically validated.

02

1 PREDICTIVE ANALYTICS

Find your costs before they find you.

Most analytics show you what already happened — the view in the rear-view mirror. MedGuard shows you what's about to happen, before it does. And not just across your population: down to each individual member.

PREDICT

Risk and cost for each member

PLAN

A care plan specific to each person

DELIVER

Right program, right person, right time

- ✓ Emerging conditions and spend, before the claim
- ✓ Clinical cost drivers and gaps in care
- ✓ A Motivation Index score for every member
- ✓ Annual impact assessment

#1

Best predictive analytics in the field

Savings for the company and the health plan.

2 COMPREHENSIVE WELLBEING

The healthiest diet on earth, **at scale.**

Built on the Mediterranean lifestyle, the member platform gives every participant one intuitive place to see what to do, how to do it, and what they earn for doing it — branded with your logo and colors.

Every person learns differently, so the platform offers solutions that fit the needs and learning styles of each member — whether they prefer to watch, read, cook along, or compete with their team.

Member portal

Requirements, incentives, leaderboards, benefits, and HR forms at a glance.

Challenges

Activity, mindfulness, nutrition, and weight — with weekly coaching, wearables, and teams.

Education

Lifestyle & disease-management programs, meditations, webinars, live cooking demos.

AI engagement engine

Learns, person by person, which message works and when — and keeps testing.

#1

Best Diet Overall

The Mediterranean diet — ranked the #1 Best Diet Overall by U.S. News & World Report — and the foundation of every MedGuard wellbeing program.

Every program, challenge, and article is trackable and tied to incentive management.

3 CLINICAL CARE & COACHING

Clinical care for a truly whole population.

Disease-management nurses and coaches work from the same data as the wellness platform — which provides care coordination at the most fundamental level.

CARE GAPS

Close them

Analytics reveal the gaps; nurses help members close them.

MEDIUM RISK

Prevent health erosion

Stop the steady slide into higher-risk, higher-cost categories.

HIGH RISK

Bring it back down

Professional nurses guide the highest-need members back to health.

AT EVERY LEVEL OF RISK

- ✓ Nurses and coaches work from each member's full record
- ✓ Care is matched to what the data shows, not a one-size-fits-all protocol
- ✓ Emerging risk is handled before it becomes a high-cost event
- ✓ The highest-need members get hands-on guidance back to health

Where they are.

With exactly what they need

Our clinical care meets people where they are, and our nurses and coaches are skilled in the art of motivational interviewing — which is why this approach is so effective.

Cost Savings. Literally From Day One.

The validated Motivation Index scores each member's readiness to act — so you don't just know who's likely to get sick and what it will cost, you know who will respond. This MedGuard feature integrates analytics with care coordination to instantly make your program more efficient and effective.

HIGHER MOTIVATION SCORES

1

2

Ready to make a change

Levels 1–2. Prioritized for coaching now — these members will make the healthy changes.

LOWER MOTIVATION SCORES

3

4

5

Not ready yet

Levels 3–5. Matched with lighter-touch messaging that builds readiness over time.

01

Identify

Data algorithms compute over 900 variables to objectively rank each member's readiness to change.

02

Prioritize

Reaching out to the highest readiness members gets you to those who'll make those key changes now.

03

Impact

Nurse time goes where it does the most good at the lowest cost — savings from day one.

EMERGING • GLP-1

Early indications are that the Motivation Index also predicts who stays on — or drops — their GLP-1, which could give coaches a lever to keep members on therapy.

DAY-ONE
IMPACT

More efficient
nurse time

Higher conversion
rates

Lower cost per
outcome

Care coordination closes the loop.

The interface between clinical care and the wellbeing platform.

1 Analytics sends the signal

Each member's health risk and Motivation Index arrive in the Coaching Station.

2 The care team acts

Nurses and coaches see the whole record — and know who is ready to change.

3 Wellbeing program reinforcement

Prescribe a walking challenge, nutrition program, mindfulness practice, or biometric target — with incentives attached.

4 Outcomes flow back

Coaching and program results feed analytics — so you can see how your population is doing.

COACHING TRACKING					

INSIDE THE COACHING STATION

- Biometrics + HRA in one view
- Assign programs & targets
- Track coaching progress

The right program, to the right person, at the right time.

THE RESULT

Everyone comes out ahead.

Payers

Real, measurable savings — without pulling the benefits members value.

Members

Better health now, built around them, with a finish line in sight.

Employers

Lasting employee health — not a recurring bill that only grows.

CONFIGURED AROUND YOU

Your population, your benefit strategy, your brand.

- ✓ Modular platform, programs, and reporting
- ✓ A communication plan unique to your population
- ✓ Marketing campaigns that drive enrollment
- ✓ Your logo and colors throughout the member experience

GLP-1 cost control is one application. MedGuard works across any clinical condition — and the cost it carries.

There is nothing like this integration of Analytics + Wellbeing + Care

See what the Power of Three can do for your population.
